✉ **Email:** kumargaurav03dec@gmail.com

Experience Summary:

- Working as **Software Developer**, in a wide variety of business applications. Most interested in **Server site application Development** by using **J2EE, Spring boot, JPA, Hibernate Framework** and **RESTful Webservices**.
- **Technically accomplished** Software Engineer with almost **3 years of professional excellence in Software Development**.
- Hands on experience in building application using **Spring CORE, Spring MVC, Spring Boot, RESTful Webservices, JPA and Hibernate Framework**.
- Good understanding and experience in **Singleton, Proxy and Factory Design Patterns**
- Experience in working with various **RDBMS** like **Oracle, MySQL**.

Executive Summary:

- Currently working as **Software Engineer** in **Luxoft India Bangalore** from **Aug 2022 to till date**.
- Worked as a **Software Developer** with **Birlasoft India pvt ltd.** Bangalore from **March 2020 to AUG 2022**.

Technical Proficiency:

Languages	Core Java, J2EE
Technologies	JSP/Servlet, RESTful Webservices
Database Technologies	Oracle, MySQL.
ORM Tool	Hibernate, JPA
Java Framework	Spring boot
Server	Apache Tomcat
Tools	Notepad++, JIRA, GIT

Professional Experience:

Project 1:	FXPCA – Deutsche Bank
Team Size	5
Duration	SEPT 2021 to till date
Technologies	Java, Spring Boot, RESTful Web services, JPA, Oracle
Project Abstract	<p>FXPCA is the Bank's global platform for foreign exchange confirmation and settlement. It's one of the world's largest FX confirmation and settlement system.</p> <p>FXPCA settles FX cash and Options products for more than 30 different legal entities within many countries. On an average FXPCA processes 400000 trades and options equating to hundreds of billions of dollar</p>

	daily.
Role & Responsibility	<ul style="list-style-type: none"> Involved in writing RESTful API as per the requirement specifications Actively involved in writing Business Logic, Service classes and data access layer.

Project 2:	NCS(Non Clinical Studies) - Johnson & Johnson
Team Size	6
Duration	SEP 2021 to Aug 2022
Technologies	Java, Spring Boot, RESTful Webservices, JPA, MySQL, Mark logic, Angular
Project Abstract	<p>NCS is a kind of data processing project in the field of health care. Here we processed the existing non clinical health care data based on a particular gene. Here we were mainly responsible for processing the all the data (literature, patent data and clinical trial data) related to a particular gene id.</p> <p>In line with above task, we also consumed machine learning api to predict the annotation on given articles be it literature, patent or clinical.</p>
Role & Responsibility	<ul style="list-style-type: none"> Involved in writing RESTful API as per the requirement specifications. Integrated machine learning, mark logic api with our application. Involved in writing Business Logic, Service classes and data access layer.

Project 3:	Knowledge NeuroHub POC- (Johnson & Johnson)
Team Size	4
Duration	May 2022 to June 2022
Technologies	Java, Spring Boot, JDBC, JPA, MySQL.
Project Abstract	<p>Knowledge NeuroHub application is internally developed and hosted application.</p> <p>It basically focuses on Neuroscience domain of non-clinical studies. This POC was developed to find out the importance of non-clinical studies if we further segregate the non-clinical studies based on Therapeutics.</p>
Role & Responsibility	<ul style="list-style-type: none"> Involved in writing RESTful API as per the requirement specifications. Involved in writing Business Logic, Service classes and data access layer.

Project 4:	CSR POC- (Johnson & Johnson)
-------------------	---

Team Size	8
Duration	Apr 2021 to AUG 2021
Technologies	Java, Spring Boot, JDBC, MySQL.
Project Abstract	CSR application is internally developed and hosted application. It basically handles the country specific requirements of a particular drugs. It has two main modules project other is change control. In project module user can create new project based on the project and country information available in the existing data pool also each project may associate multiple CSRs base on the selection of activity type and category. In change control module cc ser can edit the csr and send it for review.
Role & Responsibility	<ul style="list-style-type: none"> Involved in writing RESTful API as per the requirement specifications. Involved in writing Business Logic, Service classes and data access layer.

Project 5:	GLOBAL BILLING TRANSFORMATION - (State Street)
Team Size	15
Duration	Apr 2020 to Jan 2021
Technologies	Java, Spring Boot, JDBC, Oracle.
Project Abstract	The client is an American financial services and bank holding company. This project involves the customization of the GBO program using Oracle Revenue Management and Billing. The project involves the Conversion of the data from the legacy systems to the new system, development of new Custom Portals, Extensions, Interfaces, Reports and other objects.
Role & Responsibility	<ul style="list-style-type: none"> Analysing business requirements documents and functional specs. Participated in various meetings to discuss Enhancement and Modification Requests. Mostly involved in conversion module of the application.

Academic Qualification:

- Completed My **B. Tech (ME)** from **GBTU**.

Location: Bengaluru
